

Building Better Analytics Solutions with SAP Technologies

CELEBRATING DECADES OF SAP INNOVATION

Since 1996, EPAM's SAP experts have enabled businesses to quickly understand their data and make informed decisions. We utilize SAP technologies to improve enterprise business process efficiency by applying solutions across budgeting, financial consolidation and forecasting. Through our deep SAP expertise, EPAM delivers our client's vision as it relates to customer expectations, business growth and cost management.

EPAM IMPLEMENTS ANALYTICS FOR GREATER EFFICIENCY

Our ability to take the most complete, functionally rich business intelligence products from SAP and customize them for our clients results in reliable, high-quality solutions that help businesses achieve their goals faster. We do this by:

- Leveraging our expertise with SAP Business Warehouse, SAP Business Objects and SAP HANA
- Extending the SAP platform with innovative SAP Analytics Cloud, SAP Data Hub, SAP Predictive Analytics and SAP Business Objects solutions
- Providing solutions in business planning, budgeting, financial consolidation, profitability and cost management
- Supporting Agile development and continuous delivery

We offer an authoritative approach to analytics that is cloud-enabled, integrated, and aligned with large-scale business goals, enabling our clients to enjoy real-time access to their key insights. We know what it takes to provide businesses with the intelligence they need to thrive in the digital age.
