

Run Your Business in Real-Time with SAP S/4HANA Intelligent Enterprise

GO DIGITAL TO THE CORE WITH SAP S/4HANA

If you're running a digital business, then SAP S/4HANA could be the missing piece you need to enter the next generation of enterprise resource planning (ERP). As the digital core that connects your enterprise to its people, business networks, IoT infrastructure, big data and more, SAP S/4HANA offers a transformative experience for managing your business processes and achieving operational excellence with live information and insights at your fingertips.

OPTIMIZE YOUR SAP S/4HANA IMPLEMENTATION WITH EPAM

EPAM and SAP have had a deep strategic relationship since 1996, with over 5 million EPAM person-hours spent on SAP projects. SAP S/4HANA was released in 2015, and EPAM has been using the product to manage its global business processes since 2016. Here's our expertise at a glance:

- We have been successfully migrating all our legacy systems (including SAP ERP) to the SAP S/4HANA platform, which has led to a 30% speed increase in generating finance reports and a 50% decrease in localization costs for EPAM
- We have deep experience in business process automation for various industries as well as proven expertise in SAP S/4HANA implementations
- We expand standard and develop new Fiori applications for SAP S/4HANA
- We have comprehensive experience in SAP S/4HANA integration with cloud and IoT solutions
- We minimize project duration and gain the best project results using SAP Activate methodology and SAP Solution Manager as our end-to-end delivery platform
- We staff a professional team of SAP Activate-certified project managers for successful SAP S/4HANA implementation and support

KEY PRODUCT FEATURES

SAP S/4HANA's main features include:

- Optimized business processes incorporating all domain-specific characteristics for efficient business development and transformation
- User-friendly interface unified for all digital devices (including mobile)
- Simplified data modelling to enable procurement of analytics reports from a single point
- High-quality embedded integration with external digital cloud products

GET STARTED WITH EPAM

When we combine the power of SAP S/4HANA and our decades of experience implementing and integrating SAP products, the result is unparalleled ERP optimization for your enterprise.
